5th July 2007

To whom it may concern:

Founded in 1972, and now part of **Scholle Corporation**, **JW Automarine** of Fakenham, Norfolk, England are leading international designers and fabricators of products made from coated fabric and films. Products include underwater salvage lifting bags, submarine components, specialised inflatable buoyancy products, and bulk storage water, diesel and chemical tanks. See www.jwautomarine.co.uk.

Our relationship with **Digital Network Solutions Ltd** has been existent for the last 5 years during which time they initially provided on-site support on an informal basis. More recently, we have entered into an ongoing relationship with them whereby they provide 2nd line IT and telephony support to our users (usually still on-site) as well as occasional consultancy, equipment supply, project management and implementation. As an integral part of this process they liaise with users, 1st line in-house support and our group IT dept based in Chicago, USA.

Digital Network Solutions Ltd has given support to our office requirements at short notice and often in unsociable hours to a high performance quality. In addition, if any of our staff require training or instruction, this is always given with great clarity.

Our relationship has been very satisfactory and I have every reason to suppose that this will continue for many years to come. I would, therefore, be happy to recommend their services to anyone with similar requirements.

Yours faithfully,
